→ 比例 (used - humans)

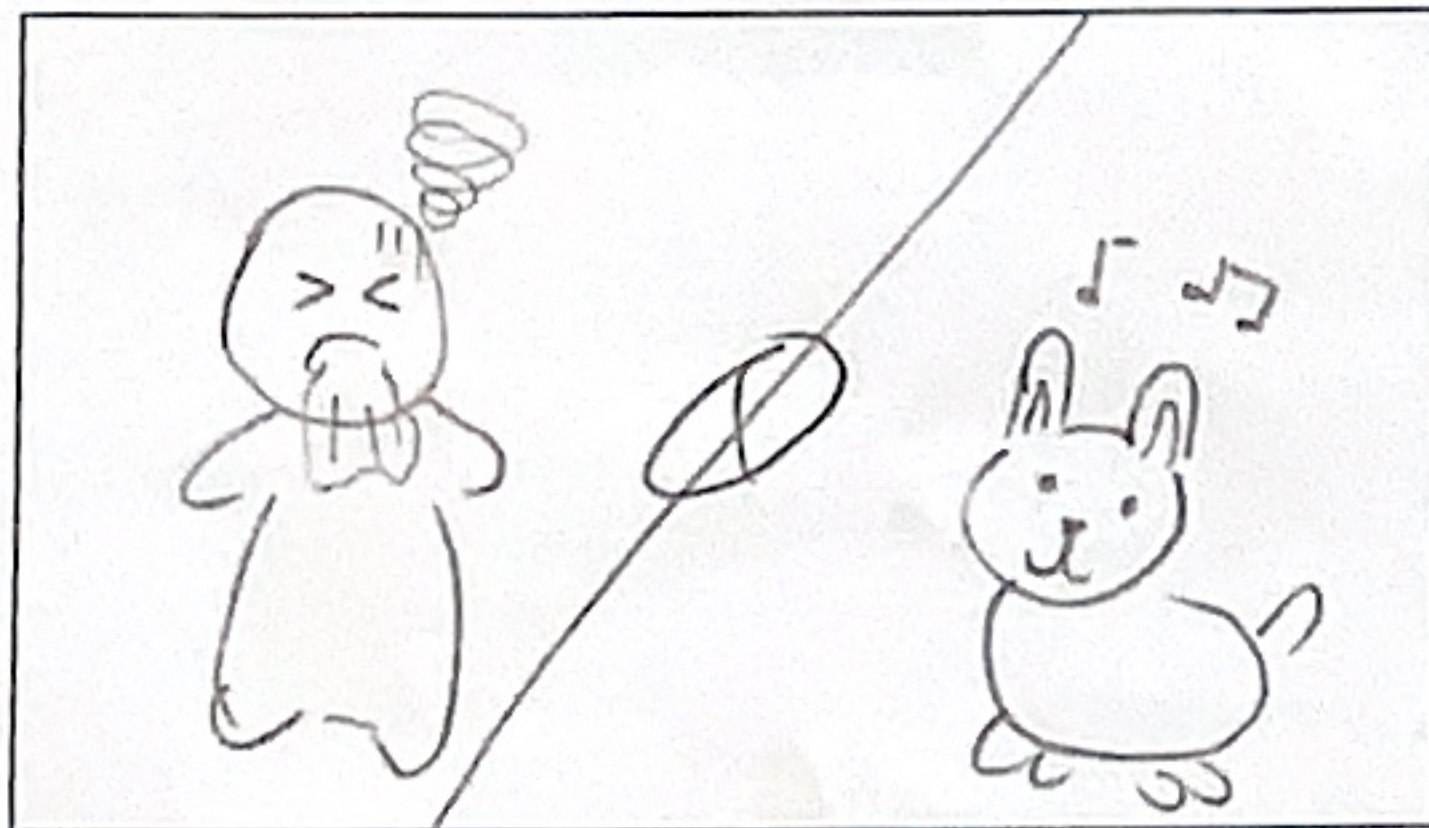

Animal Testing  
Necessary for Medical Research?

1. Introduction  
- Showing the title

→ master

5. What is Animal Testing  
→ Scientific experiments → research  
(medical) → knowledge on diseases + treatment

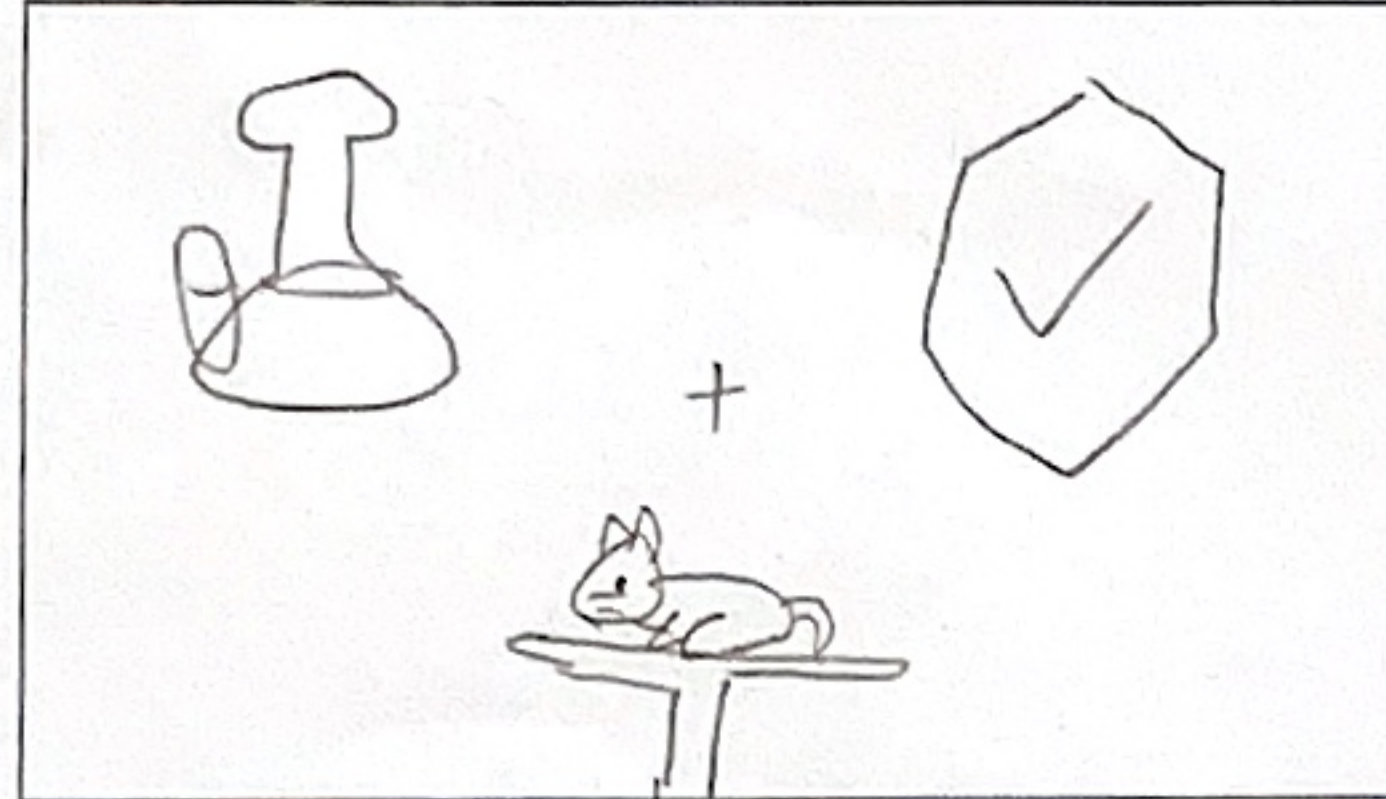

9. Species Extrapolation  
Species differences can lead to inaccurate predictions

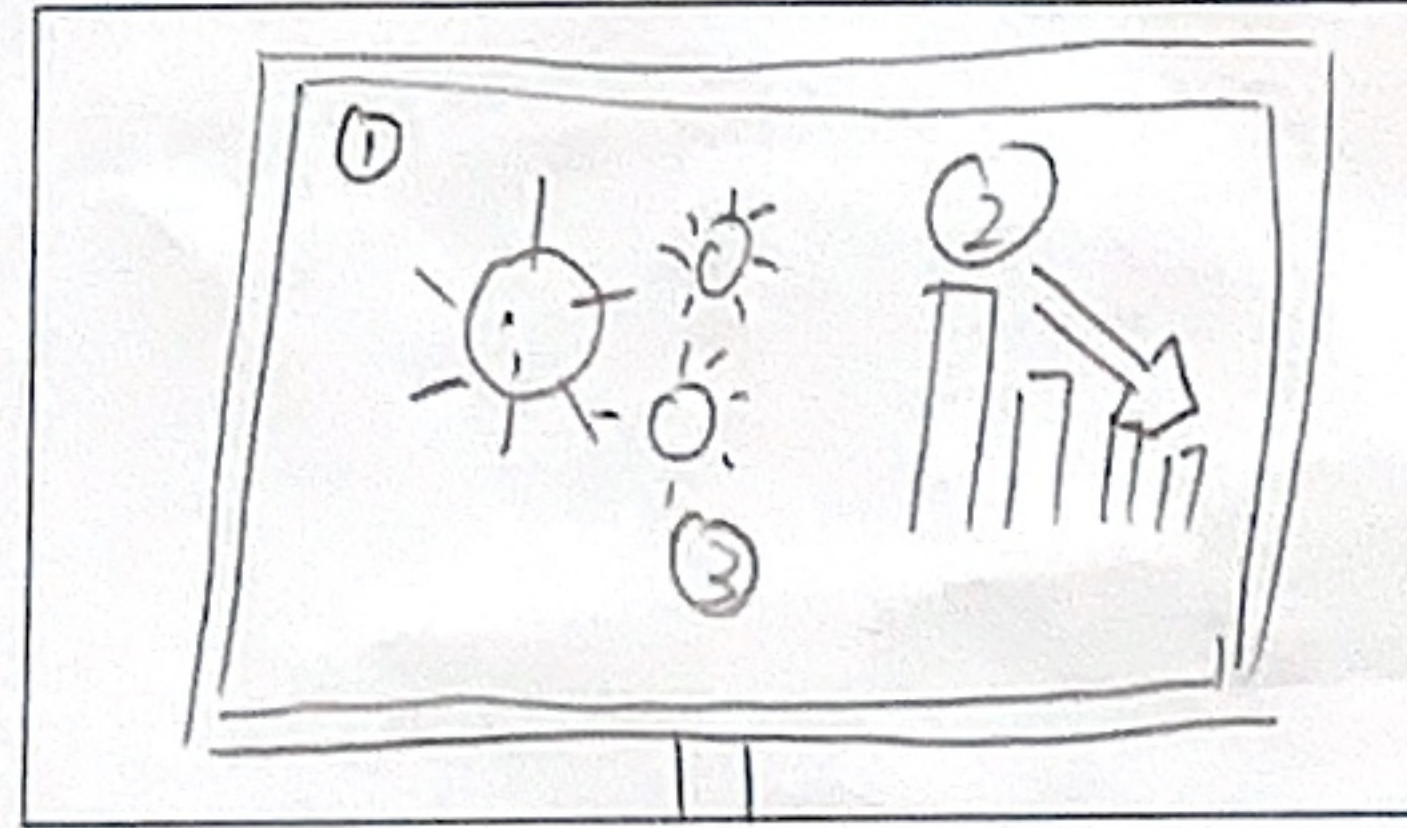

What if humans and animals  
SWITCHED PLACES?

2. Thought-Provoking Question

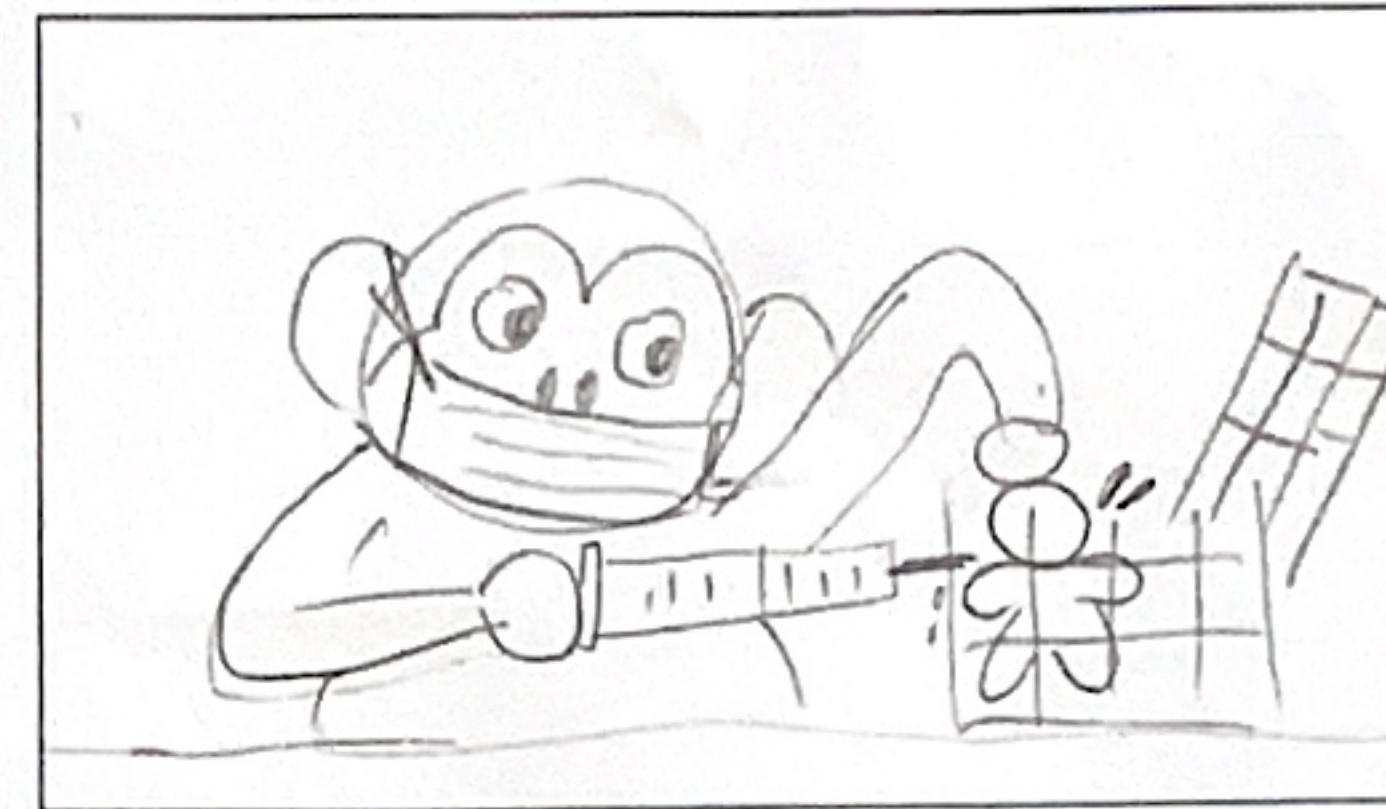

OR: Imagine if humans were the ones in cages?

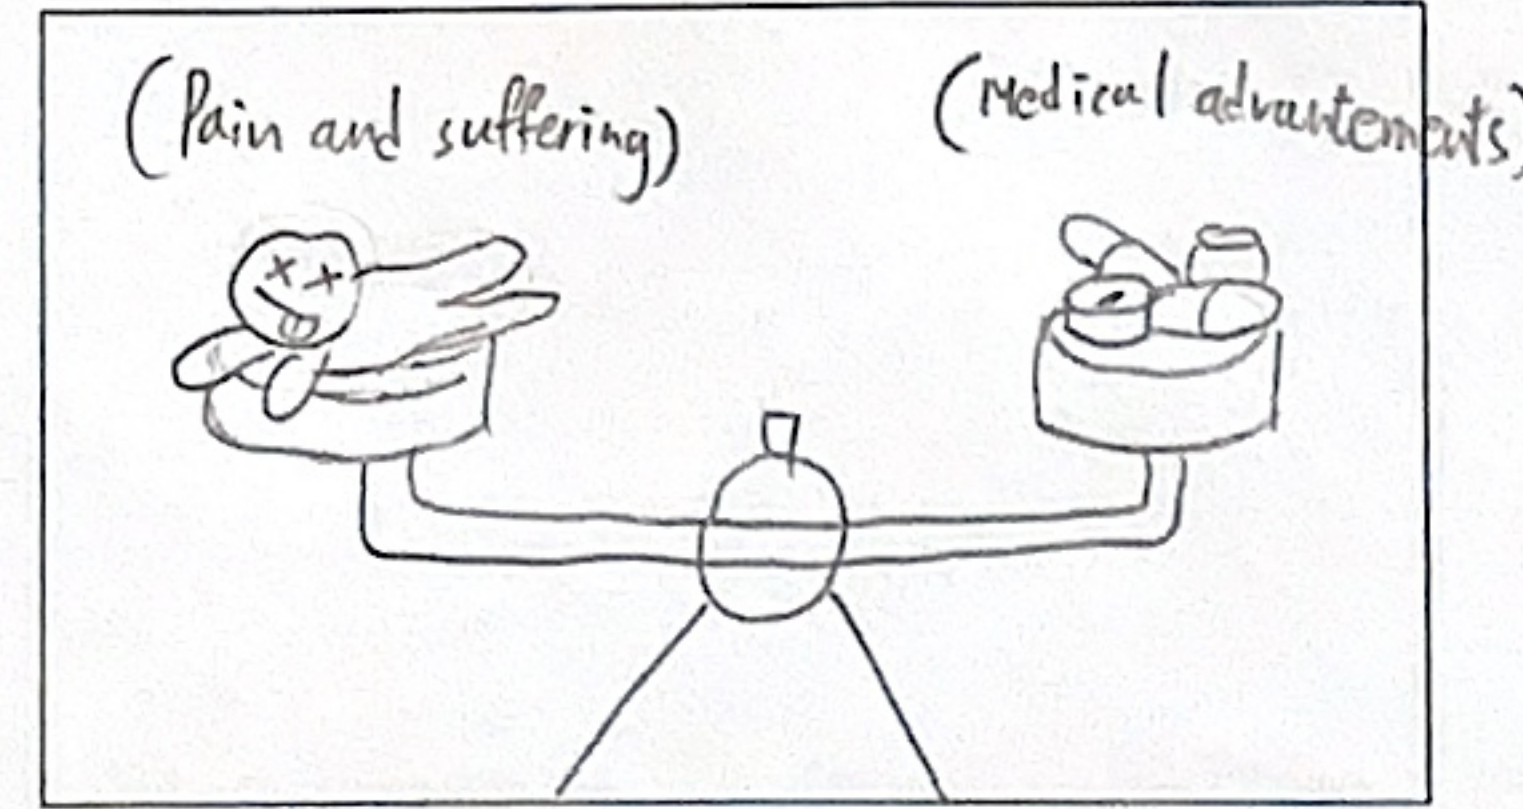

6. Why is it conducted?  
→ safety Assessment → surgical Techniques  
→ Drug development

10. Protective Measures (3Rs)  
• Replacement  
• Reduction  
• Refinement

3. PAUSE

7. Ethical Concerns  
+  
PAUSE

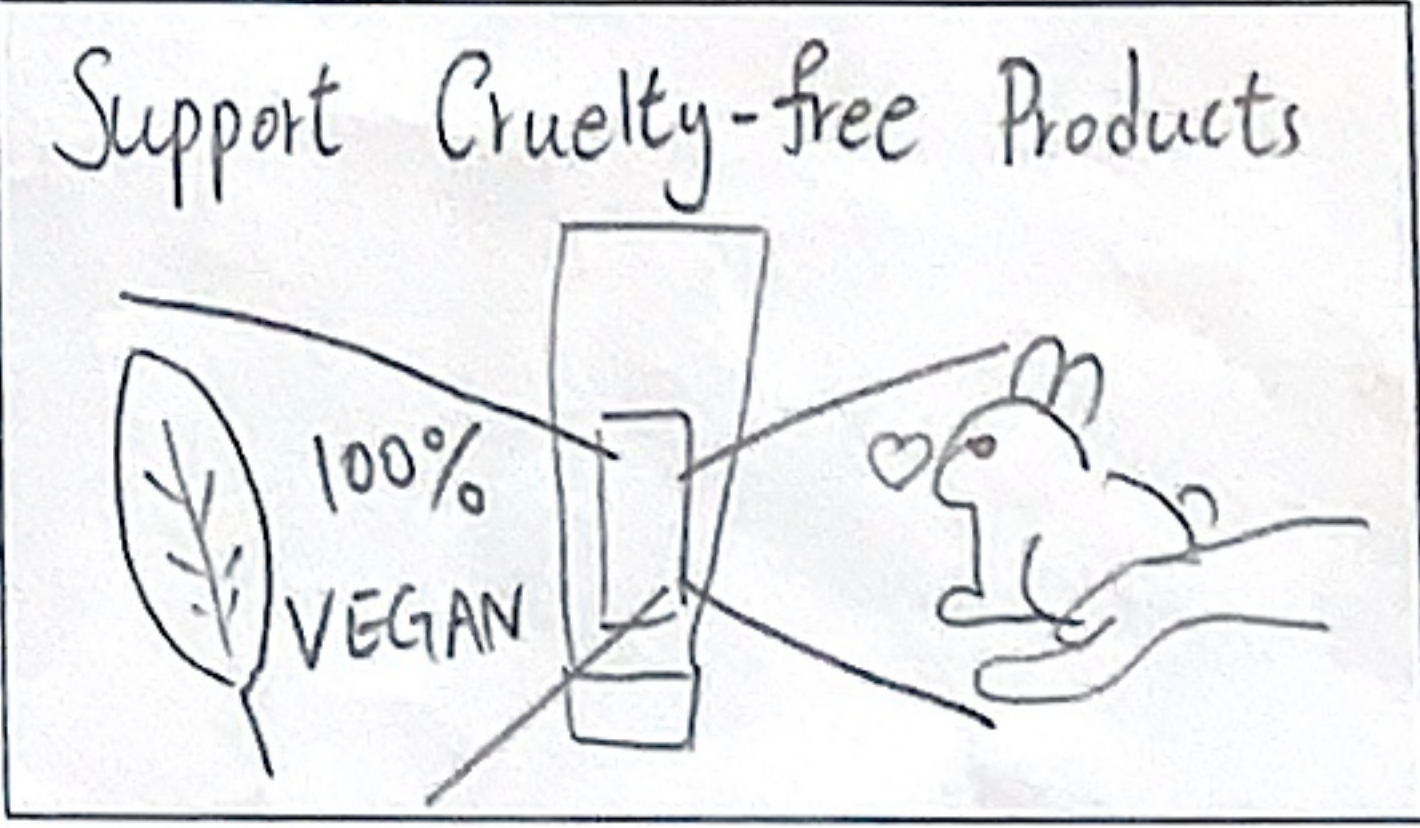

11. Global Shifts in Legislation  
→ 45 countries have banned  
→ But many others still allow it

192.1m  
2000  
2005

4. Show Data  
(192.1 millions in 2015)  
(115.2 millions in 2005)

8. Transition Back to Animal Testing Reality  
⇒ In reality, it's animals who suffer.

12. CTA  
You can make a difference  
→ Support cruelty-free products
